

EKAINBERRI

Ekainberri is a replica of the famous Ekain cave. **In other words**, It is Ekain-2.

Ekain is famous for its paintings that are from the Magdalenian period. **What is more, according to the specialists**, the horses of this cave are unic and they are the best horses pictures in the world.

Moreover, this cave was declared World Heritage for Humanity by UNESCO on 7th July, 2008.

However, we can't visit it because the cave's micro-climate is very fragile, and **as far as I am concerned**, this was the main reason for building Ekainberri, the replica of Ekain.

Despite Ekainberri is located in the valley of Sastarrainm, 600 meters from the original cave, it is near the center of Zestoa. I have been three times visiting it and in my opinion you can learn a lot there. **To sum up**, I exhort you to visit it.

SPA OF ZESTOA

The origin of Spa of Zestoa comes from many years ago . The legend account that in 1760, some dogs of Marques de San Millan after bathing in some hot pools, were cured of scabies they had.

However also the waters are for gallbladder disorders, liver and apparatus digestive. In other words, the water's not only for bathing.

These waters were declared the utility public in 1792 and in 1804 was opened the Spa of Zestoa. Then it's when the tourism started in the Basque Country. The province of Gipuzkoa had 11 spas of which now there is only the Spa of Zestoa.

The hotel has 130 rooms, 3 floors and big spectacular restaurant. The restaurant is a architectural gem, has 520 square meters surface with a height of 12 meters and has got capacity for 550 persons.

In my opinion the Spa of Zestoa is a good place to stay some days and relax with family or alone.
